

Find a dentist.

Looking for a provider in your ZIP code? We can help. Use your employee dashboard to find a match that's close to home and in-network.

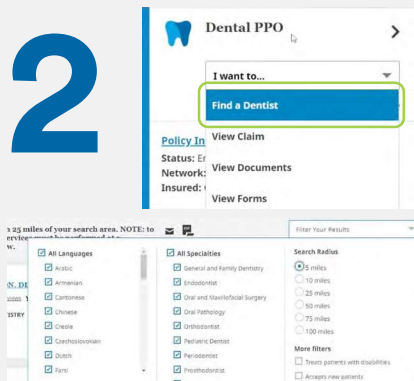

How to:

1

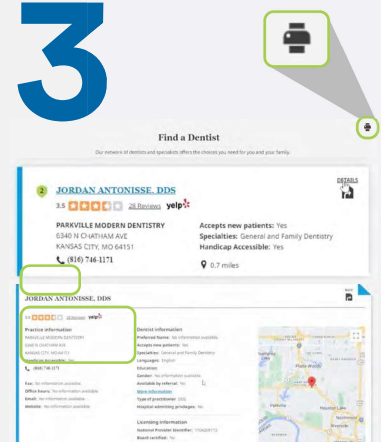

From the employee **dashboard**, you can either go on **My Accounts** at the top and then click on **Dental PPO** or you can scroll down to your dental card on the main page. Please note that you will need your network in order to find a dentist. You can **find the network by viewing the Dental card**.

2

From the dental card, click on **"I want to"** and then **"Find a Dentist."** Once here, **enter the network** from the previous screen... **and your zip code**. If you have a specific dentist and want to check if they're in-network, you may **enter their name here**, or **leave it blank** and click **"Find."** A high number of results may come back. You can filter the results to be **within a smaller radius**, such as 5 miles. This should reduce your number of results to a more manageable number.

3

Once you find a dentist you wish to choose, **click on Details** to get key information like whether they're **taking new patients**, **any specialties they may have**, as well as **their address and office hours**. If you go back to the search results, you can also save the results as a **printable PDF**, or **email them to yourself**, or **anyone else**.
